

Confidential Client

Conceptual Design & Capital Cost Estimate for Material Processing Facility

Project Profile

Background

A confidential client desired to move forward with the conceptual design and capital cost estimate for a material processing line. This included the preparation of a facility model for presentation purposes.

DEI Scope of Work

DEI was hired to conduct site investigations and prepare a conceptual facility design, model and capital cost estimate.

DEI Team Activities

- Conducted site visits to define property limits, identify available utilities and storm water requirements
- Met with the client to define the goals and objectives of the project
- Prepared civil, structural and architectural design for the facility including project assumptions to be used in a capital cost estimate
- Prepared a 3-D model to be used for presentation purposes
- Layed in equipment to be provided by others
- Prepared a capital cost estimate
- Prepared a project schedule
