

Confidential Client

AD Evaluation – Organics Management

Project Profile

Background

A confidential client was moving forward with the selection of a vendor to design, fabrication and install an AD facility to process food waste. This included the recovery and processing of biogas for beneficial use. The vendors that participated in the process offered wet, horizontal plug flow, vertical plug flow and garage/leach-bed type AD systems.

DEI Scope of Work

DEI was hired to assist in developing the evaluation criteria for selection and to provide detailed review of the biogas processing and beneficial use component of the supply.

DEI Team Activities

- Assisted in developing a list of vendors to solicitation of an SOQ and RFP
- Assisted in developing the design criteria that was included in the RFP
- Developed the evaluation criteria to be used in evaluation of the responses to the RFP
- Conducted detail review of the biogas treatment and beneficial use systems
- Conducted interviews and made recommendations to the client regarding vendor selection

Results

- Client selected a vendor to design, fabricate and install the AD system
